SUBJECT: INSTRUMENTATION PACKAGES FOR THE MLS STRAINER

#7-A-240

4/6/2001

REVISED 2/13/02

AUTOMATIC TIMER FLUSH PACKAGE.

The **ATF** valve package insures that the particulate that falls down to the debris reservoir is automatically flushed. The power supply and time controls for the valve package are housed inside the watertight PDA controller box. Depending on the application, the end-user simply dials in the flush frequency and flush duration of the valve. Based on the parameters that are programmed, the ball valve quickly opens and closes, minimizing the volume of water that is flushed from the strainer.

PART NUMBER	DESCRIPTION
PDA	Pressure Differential Alarm Package
ATF	Automatic Timer Flush Package - Using a 1-1/2" flush valve

For use on all **ADVANTAGE** strainer models:

MLS-2, MLS-3, MLS-4, MLS-6, MLS-8, MLS-10 (1-1/2" flush port)
