SUBJECT: DUAL ZONE DOLLY FOR SENTRA TEMPERATURE CONTROLLERS

FYI #282

4/27/07

Molders often need to run different temperatures on each mold half to produce the best quality part.

Advantage can provide a dual zone dolly that holds two standard single zone temperature control units to meet this need.

The dual zone dolly provides the convenience of a dual zone configuration while providing the economic first cost and ease of maintenance associated with independent single zone units.

Options:

- Single cooling water supply and drain connection
- Single power supply connections

Shown in photo: (2) Advantage Sentra temperature control units with VE microprocessor control instruments on dual zone dolly with optional single cooling water supply and drain connection and optional single power supply connection
