**SUBJECT: IMMERSED PLATE COIL HEAT EXCHANGERS**

**#301**

**01/25/2013**

Plate coil heat exchangers can be used to heat and cool tanks containing chemicals and other fluids where direct contact between the heating or cooling fluid and the process fluid is not possible. Plate coil heat exchangers can be ganged together to provide a wide range of cooling and heating capacity.

Advantage does not manufacture plate coil heat exchangers but can suggest sources of this type of heat exchanger.

**Applications:** Plating bath cooling. Chemical heating and cooling. Quench tanks.
